PowerDisc Combination

ZIEGLER |

The PowerDisc Combination is designed for large area implementation. Whether contractor, machinery cooperative or large operation – your best choice for large area implementation and optimal capacity utilization for large harvesting machines is the PowerDisc Combination.

PowerDisc Combination

The heart of every PowerDisc disc mower is the proven monoblock cutter bar. Due to its special design it is the guarantor for optimal cutting results.

Monoblock cutter bar

- The sleek design ensures optimal cut and problem-free crop flow.
- Front offset cutter discs prevent interference in the mowing zone.
- An easy-to-change cutter bar cover prevents damage to the cutter bar
- Hardened spur gears ensure a long service life.
- Maintenance-free, generously dimensioned for maximum durability and smooth running.
